Welcome home.

PANELS / ALUMINIUM / SECURITY

ENTRANCE DOORS

Design collection / Inspired by your project

An entrance with character.

GUIDE TO THE COLLECTION

The design collection 03

Decorative panels 04

Aluminium entrance doors 11

Security entrance doors 15

Glass and privacy 19

Colour and material effects 20

Project specification 21

Contact 22

An illustrated design proposal. Model references identify catalogue concepts, not verified manufacturer product codes.

One entrance. Your expression.

TRADITIONAL / CONTEMPORARY / SECURITY

Decorative panels

Raised mouldings, arched apertures and decorative glazing inspired by the supplied reference. Solid and glazed designs in coordinated finishes.

Aluminium entrance doors

Clean geometry, refined metal finishes and wood effects. A contemporary visual language for the entrance.

Security entrance doors

Traditional or contemporary decorative faces for a security-door project. Select the complete construction and documented performance with the supplier.

Images are AI-generated design visualisations. They do not establish thermal, weather, acoustic, fire or burglary-resistance performance.

Tradition, colour and light.

SOLID AND GLAZED DESIGN OPTIONS

Six interpretations of the reference panels, with raised details, glass apertures and opaque counterparts. Panel substrate and supporting door system are specified per project.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Arched light

SI-P01 / DESIGN CONCEPT

Warm white

Textured glass

Decorative entrance panel concept. Match the panel, door frame and hardware to the intended construction.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Arched panel

SI-P02 / DESIGN CONCEPT

Anthracite grey

Solid panel

Decorative entrance panel concept. Match the panel, door frame and hardware to the intended construction.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Diamond light

SI-P03 / DESIGN CONCEPT

Golden oak effect

Decorative glass

Decorative entrance panel concept. Match the panel, door frame and hardware to the intended construction.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Twin light

SI-P04 / DESIGN CONCEPT

Sage green

Two frosted apertures

Decorative entrance panel concept. Match the panel, door frame and hardware to the intended construction.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Six panels

SI-P05 / DESIGN CONCEPT

Walnut effect

Solid panel

Decorative entrance panel concept. Match the panel, door frame and hardware to the intended construction.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Vertical light

SI-P06 / DESIGN CONCEPT

Stone grey

Full-height frosted strip

Decorative entrance panel concept. Match the panel, door frame and hardware to the intended construction.

AI-generated design illustration. Final construction, finish and availability require confirmation.

A clear contemporary line.

SOLID AND GLAZED DESIGN OPTIONS

Three visual concepts for aluminium entrance doors: opaque anthracite, bronze with glass and a natural oak effect. Frame, panel, hardware and glazing are selected as a compatible system.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Pure aluminium

SI-A01 / DESIGN CONCEPT

Anthracite grey

Solid panel

Aluminium entrance-door concept. Confirm profile, panel build-up, threshold, hardware and glazing with the selected system.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Aluminium light

SI-A02 / DESIGN CONCEPT

Warm bronze

Frosted vertical strip

Aluminium entrance-door concept. Confirm profile, panel build-up, threshold, hardware and glazing with the selected system.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Aluminium oak

SI-A03 / DESIGN CONCEPT

Natural oak effect

Solid panel

Aluminium entrance-door concept. Confirm profile, panel build-up, threshold, hardware and glazing with the selected system.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Design for a security project.

SOLID AND GLAZED DESIGN OPTIONS

Three decorative concepts for an armoured entrance-door project. A substantial appearance alone does not establish security performance; confirm the complete tested assembly.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Security contemporary

SI-S01 / DESIGN CONCEPT

Graphite grey

Solid panel

Security-door appearance concept. Confirm the steel assembly, lock, cylinder, frame anchoring and documented resistance class.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Security classic

SI-S02 / DESIGN CONCEPT

Walnut effect

Solid panel

Security-door appearance concept. Confirm the steel assembly, lock, cylinder, frame anchoring and documented resistance class.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Security light

SI-S03 / DESIGN CONCEPT

Warm white

Frosted aperture concept

Security-door appearance concept. Confirm the steel assembly, lock, cylinder, frame anchoring and documented resistance class.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Light, with the right privacy.

GLAZED / DECORATIVE / OPAQUE

Textured and frosted glass

Softened transparency for entrances where daylight and privacy both matter. The drawings show visual effects, not a final glazing specification.

Decorative glass

Arches, glazing bars and geometric motifs can give the panel its character. Confirm the available design and compatible build-up.

Safety and security glazing

Specify the glass composition and any required tested performance for the complete door. Security-door glazing must be compatible with its documented assembly.

AI-generated design illustration. Final construction, finish and availability require confirmation.

Colour shapes the entrance.

ILLUSTRATED FINISH DIRECTIONS

Warm white

Anthracite grey

Sage green

Walnut effect

Warm bronze

Natural oak effect

Warm whites, muted colours, metal tones and wood effects. The images illustrate a palette; approve actual colour, gloss level and texture on a physical sample.

Illustrated colours are indicative and are not RAL-certified swatches. Availability depends on the selected system.

Your entrance. Clearly specified.

DESIGN / CONSTRUCTION / INSTALLATION

Design and finish

Choose the concept, panel geometry, solid or glazed appearance, and approved physical finish sample.

Door system

Define decorative-panel construction, aluminium system or security-door assembly. Confirm dimensions and compatible components.

Configuration

Specify single or double leaf, side panels or top light where available, handing, threshold and clear passage.

Hardware and access

Select handle or pull bar, hinges, lock, cylinder and any compatible access-control options.

Required performance

State project requirements for thermal insulation, weather resistance, acoustics, security or fire resistance. Obtain the relevant assembly documentation.

Installation and supply

Confirm site dimensions, wall construction, fixing details, delivery scope and installation responsibility.

The illustrated range is a design proposal. No numerical performance or certified resistance class is claimed by these images.

Let us design your entrance.

SPIER-IN / WINDOWS AND MORE

Send us your dimensions, reference images and preferred finishes. We will define the appearance and confirm the suitable construction for your project.
